Rexleigh Area City Water Project

June 26, 2013

Reasons for survey

- Ask about current well water quality
  - Any continual issues (odor, equipment replacement, etc)
- Expanded city water project will lower costs
  - More participating homes per length of water main run lowering cost per household
  - Fixed costs such as financing fees, engineering study, etc. spread across more households lowering the cost per household
- Survey is best and only way to determine how many households in the community have an interest in switching to city water

Area Of Survey

- Regent Rd.
- Regent Ct.
- Laramie Ln.
- Thrush Ln.
- Pelham Pkwy
- Rexleigh Dr
- Glencoe Pl
- Ellsworth Ln.
- Lake Drive

Interest Level Map

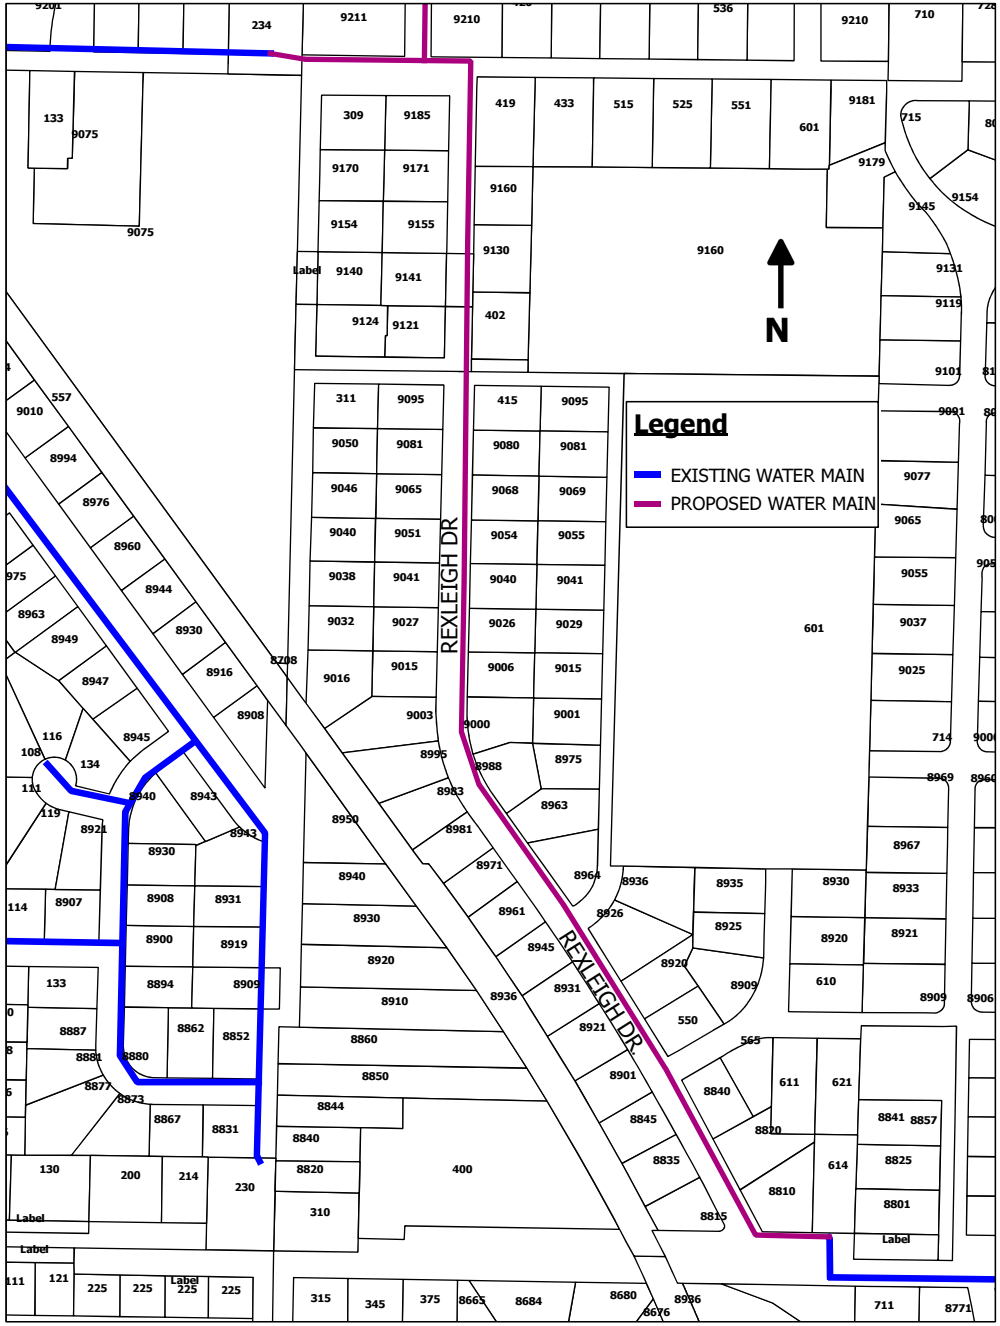
Yellow = Yes

Blue = Maybe

Red= No

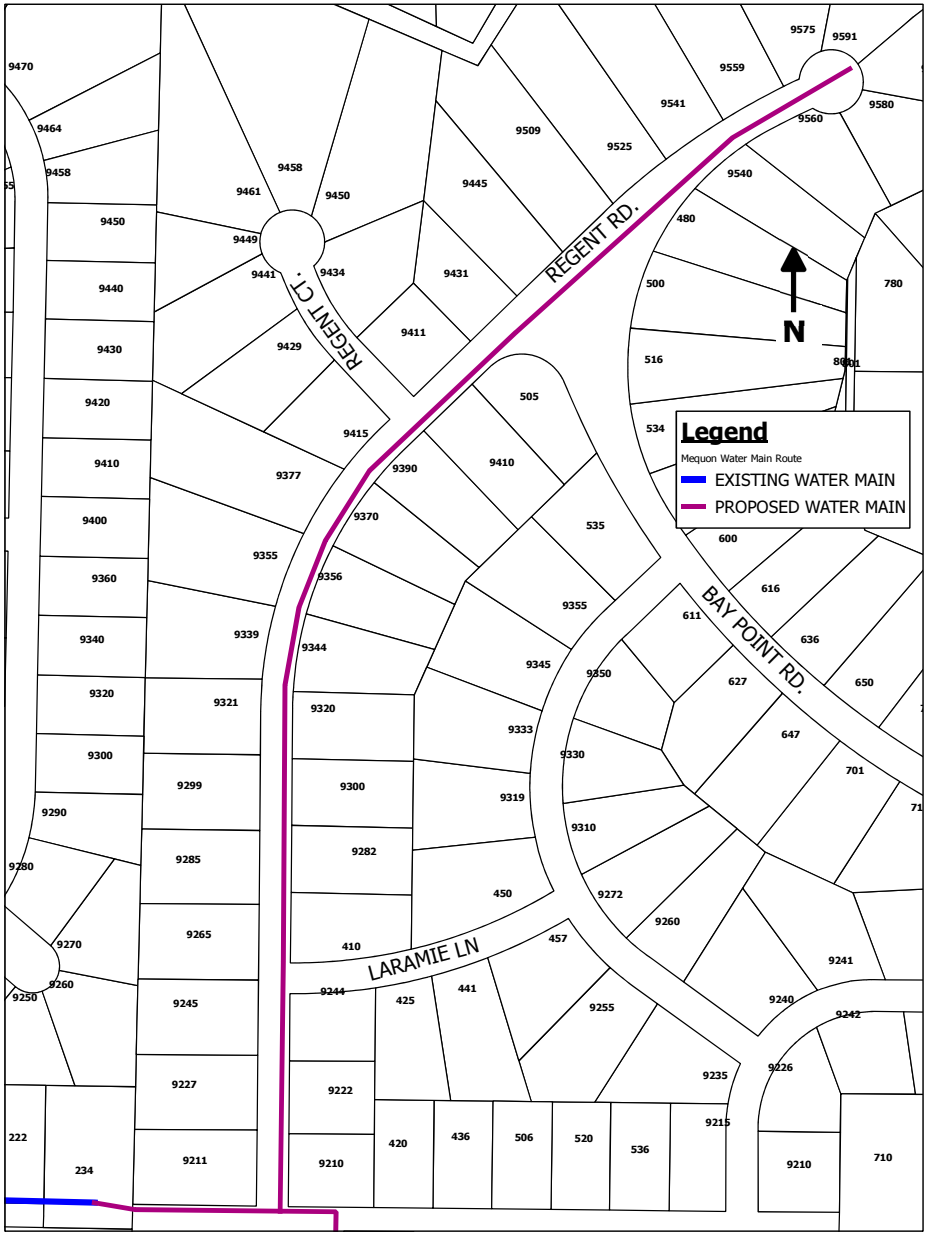
Route: Rexleigh Only

REXLEIGH WATER MAIN EXTENSION



Route: Regent Rd.

REXLEIGH WATER MAIN EXTENSION



2013 Project: Starting Point

Approximately 50 homes, possibly more

- Northway Water Co-Op #1
  - 12 homes, on Seneca and Navajo just north of Brown Deer Road
- Vista Del-Mar Co-Op
  - 29 homes, on East Marti Court, encircled by Malibu drive / Regent / Santa Monica
- Other homes
  - Have made a commitment to join the project
  - 8 or 9 can be included no matter what routes we take
  - Many more additional homes that have committed but can only be included depending on route

Interest Level Map

(darker green = more interest)

2013 Project: Initial Response

Current Participation

Some numbers

- 13,750 feet of water main installed (2.6 miles)
  - (both BRWAA and Ravine Baye projects)
- 25 fire hydrants installed
  - (both BRWAA and Ravine Baye projects)
- PVC water mains good for 50 years
- > 10,000,000 gallons of water delivered to the BRWAA homes per year
  - (70,000 gallons per year per home)

Group Project

- Economies of scale
  - Will help lower costs on every aspect of the project (both public & private)
- Ability to Finance
  - $500,000 minimum for village to assist with the public financing
- Revenue credit ($2,600) may not apply later
- Partnership of Village & City to implement infrastructure/construction
